Abdullah Muhammad

has successfully completed the online Specialization

Game Design and Development with Unity

In this Specialization, learners build the skills necessary to design and development games. The Specialization focuses on both the theory and practice of game making. From a technical standpoint, learners create four game projects in the Unity game engine, include a 2D Shooter, 2D Platformer, First-Person Shooter, and 3D Platformer. In the Capstone Project, learners create a completely original game of their own design from initial concept up to the first playable prototype. The Specialization comes from the Michigan State University game program which is ranked as one of the top programs in North America.

Brian Winn, Full
Professor, Michigan
State University,
Department of Media
and Information

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
