

ABDULLAH MUHAMMAD

Software & Mobile Application Developer

abdullahmshafiq098@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Game Portfolio: abdullah0364.itch.io

IBM Certified · Mobile App Developer · AI Developer · Full Stack Developer

PROFESSIONAL SUMMARY

Results-oriented **Software, Web, and Mobile Application Developer** with a **Bachelor of Science in Computer Science** and a **CGPA of 3.5**. Experienced in developing **responsive web interfaces**, **cross-platform mobile applications**, **Firebase-integrated systems**, and **Python/Flask backend services**. Completed seven major Coursera credentials comprising **62 courses** from **IBM, Google, and Michigan State University** in **mobile application development**, **full-stack software engineering**, **artificial intelligence**, **data analytics**, **business intelligence**, and **Unity game development**. Proficient in **React, Next.js, Flutter, Firebase, REST APIs**, **user authentication**, **CRUD operations**, **Git and GitHub**, **GitHub Pages deployment**, **debugging**, and **technical documentation**. Combines **software engineering expertise**, **analytical thinking**, and **AI-assisted development practices** to deliver **reliable, scalable, and maintainable digital solutions**.

TECHNICAL SKILLS

Programming	JavaScript, TypeScript, Python, Java, Dart, SQL, HTML5, CSS3	Frontend	React.js, Next.js, Tailwind CSS, Bootstrap, Responsive UI
Mobile Development	Flutter, React Native, Android Studio, Mobile UI/UX, notifications	Backend & APIs	Flask, Python services, REST APIs, Google SMTP
Database & Cloud	Firebase Authentication, Firestore, Realtime Database, SQL, NoSQL	Data & Analytics	Python, R, Tableau, Statistics, Regression, Machine learning
AI & Tools	Generative AI, prompt engineering, code generation, debugging, and logic review	Development Workflow	Git, GitHub, VS Code, Anaconda, L ^A T _E X, Overleaf, and GitHub Pages

PROFESSIONAL EXPERIENCE

Frontend Development Intern SoftGrowTech	<i>June 2026 – July 2026</i> Remote
▶ Completed a four-week frontend-development internship focused on responsive, interactive, and production-ready web interfaces. ▶ Built reusable modal components, a persistent light/dark theme switcher, and an infinite-scroll interface using HTML, CSS, and JavaScript. ▶ Developed a Taskflow Firebase-based project-management dashboard with Next.js, React, TypeScript, Tailwind CSS, Firebase Authentication, and Firestore. ▶ Implemented CRUD operations, search and filtering, project and task management, charts, responsive navigation, theme switching, modals, and toast notifications. ▶ Deployed projects through GitHub Pages and produced setup instructions, project documentation, and README files.	
Remote Web Development Intern Qwetrum Technologies	<i>June 2026 – June 2026</i> Remote
▶ Develop responsive web projects using semantic HTML, modern CSS, JavaScript ES6+, asynchronous programming, and external APIs. ▶ Built a REST Countries application, timed quiz, validated multi-step form with saved progress, mini e-commerce interface, and capstone shopping workflow. ▶ Applied local storage, dynamic filtering and sorting, cart management, reusable UI patterns, Git version control, and GitHub-based delivery. ▶ Strengthened remote collaboration, iterative development, technical communication, and deadline management through structured project submissions.	

Independent Software Developer Self-Directed Project Development

Ongoing
Oman / Remote

- ▶ Design and build mobile and web applications using Flutter, Android Studio, React, Next.js, Flask, Python, and Firebase.
- ▶ Integrate authentication, real-time databases, REST APIs, automated email services, responsive interfaces, and multi-user workflows.
- ▶ Use AI-assisted development tools to review logic, identify defects, accelerate debugging, improve code quality, and support technical documentation.
- ▶ Manage source code, branches, releases, issue resolution, and deployments through Git and GitHub.

SELECTED PROJECTS

TaskFlow Firebase Project Management Dashboard

SoftGrowTech Internship Final Project

Technology: Next.js, React, TypeScript, Tailwind CSS, Firebase Authentication, Firestore

- ▶ Developed a responsive, multi-page project-management dashboard for managing projects, tasks, priorities, statuses, and team members.
- ▶ Implemented secure user registration and login using Firebase Authentication, together with Firestore-based CRUD operations.
- ▶ Added live dashboard statistics, search and filtering, analytical charts, dark and light themes, responsive navigation, modals, and toast notifications.
- ▶ Configured GitHub Pages deployment and documented application setup, public testing procedures, and Firestore security rules.

Personal Developer Portfolio

Portfolio Project

Technology: React.js, JavaScript, HTML5, CSS3, Bootstrap, GitHub Pages

- ▶ Designed and developed a responsive portfolio showcasing software projects, technical skills, professional certifications, and internship experience.
- ▶ Presented development experience across web applications, mobile applications, backend services, Firebase integration, and AI-assisted workflows.
- ▶ Featured major projects including SmartFixOman, internship applications, Android mini-projects, React websites, and professional certification achievements.
- ▶ Implemented an interactive Git Bash-style terminal, multiple visual themes, animated interface elements, project navigation, and an AI-assistant interface.
- ▶ Deployed and maintained the portfolio through GitHub Pages.

SmartFixOman – Household Service Management Platform

Lead Developer / Project Designer

Technology: Flutter, Dart, Flask, Python, Firebase, GitHub

- ▶ Designed a mobile service-management platform connecting customers with service providers through service requests, real-time chat, and competitive bidding.
- ▶ Developed responsive Flutter interfaces and Flask/Python services for request processing, user communication, and automated notifications.
- ▶ Integrated Firebase Realtime Database to support live, bidirectional data synchronisation across customer and service-provider roles.
- ▶ Managed source code, feature development, and version control through Git and GitHub.

E-Scooter Rental System for Sultan Qaboos University Campus

Diploma Project

Technology: HTML5, CSS3, Bootstrap, Firebase Database

- ▶ Designed a responsive web-based rental-system concept to support sustainable and convenient transportation across the university campus.
- ▶ Structured Firebase Database collections for user information, scooter availability, rental records, and system-management data.
- ▶ Applied the Rapid Application Development methodology to refine the system through iterative planning and feedback.
- ▶ Conducted questionnaire-based requirements gathering with students and faculty to identify transportation needs and user preferences.

Monopoly Professional Rules

Archived Web Development Project

Technology: HTML, JavaScript, CSS

- ▶ Originally developed in 2015 as a browser-based reference for organising and presenting Monopoly professional rules.
- ▶ Built the original version using HTML and JavaScript, with emphasis on content organisation, navigation, and core functionality.
- ▶ Preserved the original source files as part of a personal software-development archive.
- ▶ Revisited the project in 2026, introduced modern CSS styling, improved usability and presentation, and published the updated version online.

WeatherApp – Native Android Application

Android Mini-Project

Technology: Android Studio, Java, Firebase

- ▶ Developed a native Android weather application with a clean and accessible interface for displaying weather information.
- ▶ Integrated Firebase for persistent data storage, saved user preferences, and application-state retrieval.
- ▶ Applied structured Java components and Android interface principles to maintain clear navigation and usability.

Responsive Food Ordering Website

Frontend Web Project

Technology: [HTML5](#), [CSS3](#), [Bootstrap](#)

- ▶ Designed a responsive, multi-page food-ordering website featuring menus, product presentation, navigation, and order-focused user flows.
- ▶ Used Bootstrap components and custom CSS to maintain consistent layouts across desktop, tablet, and mobile devices.
- ▶ Focused on clear content hierarchy, reusable interface elements, and accessible navigation.

MeditationApp and FlowerShop Website

Coursera Capstone Projects

Technology: [React.js](#), [JavaScript](#), [HTML5](#), [CSS3](#)

- ▶ Built mobile-optimised, component-based interfaces using reusable React components and structured state-management patterns.
- ▶ Implemented user interactions, dynamic content rendering, navigation, and responsive layouts.
- ▶ Applied modular frontend architecture and deployment-oriented project organisation to improve maintainability and scalability.

EDUCATION AND CORE STRENGTHS

EDUCATION

Bachelor of Science in Computer Science

Specialisation: [Software Technology](#)

Completed

CORE STRENGTHS

- ▶ Responsive web and mobile development
- ▶ REST API and backend-service integration
- ▶ Firebase authentication and real-time data
- ▶ UI component design and state management
- ▶ Debugging and structured problem solving
- ▶ GitHub workflows and deployment
- ▶ Data-driven decision support
- ▶ Technical writing and documentation

PROFESSIONAL PROFILE

- ▶ Cross-platform mobile and web development
- ▶ Full software-development lifecycle proficiency
- ▶ AI-assisted coding and prompt engineering
- ▶ Real-time database and cloud integration
- ▶ Independent learning and project delivery
- ▶ Remote collaboration and technical communication

PROFESSIONAL CERTIFICATIONS

IBM iOS & Android Mobile App Developer

2026

[IBM Skills Network](#)

14 courses

Flutter, Dart, React Native, Swift, Git/GitHub, mobile UI/UX, notifications, databases, and mobile application capstone.

IBM AI Developer Professional Certificate

2026

[IBM Skills Network](#)

10 courses

AI fundamentals, generative AI, prompt engineering, Python, Flask, and development of AI-powered applications.

IBM Full Stack Software Developer

June 2025

[IBM Skills Network](#)

15 courses

React, Node.js, Express, Django, Flask, SQL/NoSQL, Docker, Kubernetes, microservices, and cloud security.

Game Design and Development with Unity

29, 2025

[Michigan State University](#)

5 courses

2D shooter, 2D platformer, 3D shooter, 3D platformer, and an original game capstone.

Google Business Intelligence Professional Certificate

July 22, 2024

[Google / Coursera](#)

3 courses

Data models and pipelines, dashboards, reporting, visualisation, stakeholder requirements, and actionable business insights.

Google Advanced Data Analytics Professional Certificate

July 14, 2024

[Google / Coursera](#)

7 courses

Python, exploratory data analysis, statistics, regression analysis, machine learning, predictive modelling, and an advanced analytics capstone.

Google Data Analytics Professional Certificate

September 14, 2023

[Google / Coursera](#)

8 courses

Spreadsheets, SQL, Tableau, R, data cleaning, analysis, visualisation, and a complete analytics case study.
